NOTICE

A one week Summer Training Programme on “High Pressure-Temperature Techniques” for 15 students, would begin from 27th June to 3rd July, 2023 at the National Centre of Experimental Mineralogy and Petrology (NCEMP), for post-graduate students. The programme aims to introduce high pressure-temperature experimental research and multiple analytical techniques used in sample characterization in various domains of inter-disciplinary sciences. The students will be given hands-on training on planning and executing high P-T experiments and various analytical techniques to characterize the run products.

The students will be given the practical training of research and analytical high pressure temperature equipments. No remuneration, T.A., D.A and accommodation shall be provided. The students have to make their own arrangements and strictly adhere to the timings (11.00 A.M. to 4.30 P.M).

Interested students are requested to submit their application with their bio-data, e-mail address, cellphone number and a scanned photograph to the office of undersigned or e-mail : ST2022@ncemp.org on or before June 17th, 2023. The selected candidates shall be intimated by e-mail on or before June 21st, 2023.
